ACTIVE INGREDIENTS / EFFECTS

Sweet almond oil: emollient, moisturizing and elasticizing action of the skin.

Coconut oil: emollient and antioxidant properties, thanks to its content in lauric acid that makes up almost half.

Vitamin E: powerful antioxidant that protects the skin from the action of free radicals responsible for skin aging and cell damage.

Joboba oil: strong, non-occlusive emollient properties. It is easily absorbed by the epidermis and exerts a high film-forming, protective and antioxidant activity.

Argan oil: considered miraculous for the skin, with a content of more than 75% of unsaturated fatty acids, which give it a restorative and regenerating action. The high content of vitamin E and phenolic compounds effectively fight premature aging and skin relaxation.
